

## 2021 RESEARCH PROGRAM Operating Grants and Career Scientist Award

### General Guidelines and Conditions Applicable to **all** CAS Research Awards

The [Canadian Anesthesiologists' Society](#) (CAS) offers two types of research grants through the Canadian Anesthesia Research Foundation (CARF).

- **Operating Grants** provide funding to cover the direct costs related to a single research project or program. CAS offers open operating grants as well as grants that are designated for new investigators and residents.
  - *Open Operating Grants*
    - “Dr R A Gordon Research Award”
    - “CAS Research Award in memory of Adrienne Cheng”
  - *New Investigator Operating Grants:*
    - “Canadian Anesthesiologists' Society Research Award”
    - “Dr Earl Wynands Research Award”
  - *Residents' Research Grant:* “Ontario's Anesthesiologists – CAS Residents' Research Grant”
- The **Career Scientist Award** provides partial salary support for the investigator to fund protected research time. The Career Scientist Award is awarded every other year in odd numbered years.

The CAS Research Advisory Committee judges each application for an Operating Grant or Career Scientist Award on the basis of scientific merit, importance, and feasibility. Successful applicants are presented their awards during the Awards Ceremony at the CAS Annual Meeting.

## Terms & Conditions Governing all CAS Research Program Awards

The following requirements apply to the Research Awards Program.

### 1. Membership

- a) The applicant must be a CAS member in good standing in the year prior to the award year, at the time of grant application and must remain a member in good standing during the tenure of the award. To remain a member in good standing, membership dues must arrive at the CAS head office no later than **January 17<sup>th</sup>** of the award year **and annually**, if applicable, throughout the term of the award. Failure to meet this deadline will result in the application or grant being withdrawn. Although not required, it is also recommended that the co-applicants be CAS members where appropriate.

### 2. Applicant Status

- a) The applicant must hold a primary faculty appointment in a department of anesthesia at a Canadian university medical school; in the case of the “Residents’ Research Grant”, the applicant’s supervisor must hold the appointment.

### 3. Prior Award Winners

- a) A recipient of a previous Operating Grant is ineligible to apply for another Operating Grant for a period of two award cycles.

*For example, a recipient of a 2015 Operating Grant is ineligible for the 2016 and 2017 award cycles, and a recipient of a 2016 Operating Grant is ineligible for the 2017 and 2018 award cycles. A recipient of a Residents’ Award is ineligible to apply for another Residents’ Award for the following two years but remains eligible to apply for other non-resident Operating Grants. A recipient of a Career Scientist Award is ineligible to apply for another Career Scientist Award but remains eligible to apply for Operating Grants.*

		Eligibility <2 years from past award			
		Career Scientist	Residents’ award	New investigator	Open award
Past award	Career Scientist	NO	YES	YES	YES
	Residents’ award	YES	NO	YES	YES
	New investigator	YES	NO	NO	NO
	Open award	YES	NO	NO	NO

### 4. Topic of Research

- a) The research project or program for which funding is requested must be clearly relevant to the field of anesthesia perioperative medicine, and/or pain management.

### 5. Location

- a) The research must be carried out in Canada.

### 6. Ethics and REB documentation

- a) Research involving recruitment of human subjects and the use and care of animals must meet national ethical standards including the ethics policy initiatives of the Canadian Institutes of Health Research (<http://www.cihr-irsc.gc.ca/e/29338.html>).

- b) Research involving recruitment of human subjects must conform to current guidelines, such as the Tri-Council Policy Statement on Ethical Conduct for Research Involving Human Subjects ([www.pre.ethics.gc.ca/](http://www.pre.ethics.gc.ca/)) and the CAS Guidelines on the Ethics of Clinical Research in Anesthesia, available on the CAS website. Assurance must be given that any human experimentation will be acceptable to the institution on ethical grounds.
- c) Research involving the use and care of animals must be in accordance with the Canadian Council on Animal Care guidelines [www.ccac.ca](http://www.ccac.ca)
- d) Assurance must be given that the proposed research will not be undertaken until it has been accepted as meeting requirements regarding biological and chemical hazards such as outlined in the Medical Research Council of Canada “Guidelines for Handling of Recombinant DNA Molecules and Animal Viruses and Cells”. The institution must notify the Canadian Anesthesiologists’ Society if such approval is not forthcoming.
- e) A document indicating that institutional review has been initiated for animal and/or human experimentation, where applicable, must be submitted by **January 17<sup>th</sup> of the award year**. Applications that fail to fulfill these requirements will not be considered.
- f) **Proof that the application has been approved must be received by CAS before funds are released to the institution.**

#### 7. Award Term

- a) The term of an Operating Grant will be two years (July 1 to June 30 of the second year), and it is not renewable.
- b) If the approval of your REB is delayed, please contact the CAS as soon as possible. A formal extension of the term of your award may be approved, upon review.
- c) If your project is delayed, a progress report is still required. This will be reviewed by the RAC Chair and CARF representatives to decide on an extension or cancellation of the award. Please submit your report on schedule to the CAS, along with:
  - i. a description of any changes made to the project or budget;
  - ii. the reasons for the delay;
  - iii. the expected completion or continuation date, a projected figure for the unexpended balance at the termination date and any other relevant material.

#### 8. Offer and Acceptance of Award

- a) Terms of awards and “condition of approval”
  - i. Awards are made only upon the approval of CAS. All awardees and the Host Institution must formally accept an award and all awards are at all times conditional upon and subject to availability of funds to CAS and CARF.
  - ii. In addition, CAS and CARF reserve the right to terminate or change any award at any time.
- b) Notification of Award
  - i. Successful applicants will receive an official “Notification of Award” which sets

forth the duration of the award and the amount approved. The financial office and/or the research office of the host institution will be informed of the details of the award at the same time.

- ii. A revised Notification of Award will only be sent if there is a change in the amount or terms of the grant.

c) Notice of Acceptance

- i. Within two weeks of being notified, all successful applicants are required to provide:
  - 1. A signed, completed acceptance form.
  - 2. A recent high-resolution personal photograph. By submitting the photograph, you consent that CAS and CARF use it for purposes associated with the CAS Research Program, including CAS/CARF promotional material.

d) Financial Details:

- i. In accepting a research award, the recipient acknowledges and agrees that the award constitutes the maximum payable.
- ii. You must provide the CAS office with the name, contact information and email address of the institutional contact to whom the funding will be released.
- iii. Administration and payment of funds: Funds for all awards must be administered through the financial or research officer of the host institution, unless explicitly approved in writing by CAS.
  - 1. Payment of accounts for the purposes specified in the award is made by the financial officer of the Host Institution.
  - 2. Any expenditures in excess of the award will not be assumed by CAS nor reimbursed by it to the host institution.
  - 3. Expenditures are intended to reasonably match the purposes set forth in the proposed budget and any significant alternative use of funds requires prior approval of CAS.
  - 4. Expenditures incurred after the termination date will not be accepted. The Host Institution is expected to return any unexpended balances at the termination date, including early termination.
- iv. Funds are released, regardless of value, in two equal instalments to the institutional contact you provide CAS.
- v. Funds are released after all required documentation is received and approved by CAS. Start dates are, therefore, varied.
- vi. The second instalment of funds is released only after the approval of the required Reporting document(s) – see below for details on required reporting obligations.
- vii. CAS reserves the right to audit the Awards statement of accounts.

## 9. Reporting Obligations

- a) A Progress report and a Final report are due to CAS. The Progress Report is reviewed and approved **prior to** the second instalment of any funds being released by CAS.
  - i. A Progress Report is due by March 1 of the first award year.
  - ii. A Grant Final Report is due by March 1 of the second award year (including cancellation of the award). This is the grant closing report.

It is expected that all CAS funds will have been spent within the two-year term of the award. A detailed plan for any unused funds must be submitted with the grant final report and will be reviewed by the Grant Standing Subcommittee. The Subcommittee reserves the right to ask that funds not used within the two-year term of the award be returned.

- iii. The CAS Research Advisory Committee will solicit a report following the closure of the award documenting its outcomes, including abstract presentations, publications, leveraged funding, and trainee engagement.
- b) Financial statements may be requested from the institution at which the funding is held. Should a recipient of a CAS award receive funding from another source for the same research project, the proportion of funds the recipient receives in excess of the total amount applied for must be returned to CARF.
- c) Change in status of awardee
  - i. Should an awardee be unable to continue the research program for which they received support, the awardee must immediately notify CAS so that appropriate action can be taken. All awards are conditional upon the continual involvement of named (Co-)Principal Investigators and/or co-applicants. The named Principal Investigator(s) is required to notify CAS if any role changes significantly.
  - ii. If unable, for any reason, to complete the project for which the award was given, the awardee recognizes that, following the term of the award, any uncommitted balance must revert to CARF.

## 10. Public Acknowledgement of Funding

- a) All published manuscripts resulting from the CARF funding must include acknowledgement of this program. Failure to do so will result in disqualification of applications in future years; failure to acknowledge CARF funding of prior awards will result in disqualification of this application.
- b) The following funding acknowledgement must appear on all published manuscripts and abstracts resulting from the CARF funding:

“This research was supported by the Canadian Anesthesia Research Foundation.”
- c) For public presentations, a high-quality CARF logo can be downloaded from the CARF website <https://www.mycarf.ca/>.

## **Guidelines and Conditions for Online Submission**

### 1. Deadline:

- a) The completed application must be submitted online no later than 23:59 hours Eastern Time on the deadline - **December 22, 2020**. It is the applicant's responsibility to ensure that all sections of the application form are completed and are submitted by the deadline. Contact [research@cas.ca](mailto:research@cas.ca) or (416) 480-0602 if you have any questions or concerns well in advance of the deadline.
- b) The applicant may make changes to the application(s) at any time before the deadline date and prior to submitting the final application(s). Submitting the application via the "Submit" button on the final page of the application process confirms that no further changes can be made. Applicants should make sure that all information is complete and accurate prior to pressing this button. No changes will be allowed after this option has been selected or after the deadline for submission unless they are requested by the Research program.

### 2. Primary Applicants & Co-Authors

- a. Only the primary applicant creates an online applicant user profile.
- b. CAS will e-mail the applicant (at the address indicated on the application) confirming receipt of the online submission.
- c. The primary applicant will be contacted via email whenever any action is required by CAS. Please mark [research@cas.ca](mailto:research@cas.ca) as a safe email address in your mail settings.

If a co-applicant or other interested party needs a print copy of the application materials, the primary applicant may sign in and download a copy.

### 3. Multiple Applications

- a. Only one operating grant application can be submitted for the same project; the applicant named as the Principal Investigator on the application should be the same Principal Investigator on the institutional approval and/or other study registry documents.
- b. To apply for more than one award, the primary applicant must use the same account for each application.
- c. Individuals seeking both an Operating Grant and a Career Scientist Award must complete separate applications.

### 4. Application Rules

- a. Guidelines: **Please carefully read and follow all published guidelines.**
  - i. The General Guidelines and Conditions are applicable to every award. The relevant specific guidelines (i.e. the Operating Grants, Residents' or Career Scientist Guidelines) must also be followed and may supersede the General Guidelines where they explicitly state a difference. If you are in doubt, contact CAS for clarification.
  - ii. Please refer to the Guidelines for individual awards for details specific to that award.

b. Style

- i. Uploaded text documents should be single-spaced using 12-point size (unless otherwise stated). Condensed spacing or font is not acceptable.
  - ii. Ensure that images and signature pages are clear and correctly oriented.
- c. Maximum Lengths: Sections of the application have a maximum space allotment. Additional information exceeding the maximum allowance will be removed from the final submission. Protocol longer than requested lengths will not be adjudicated.
- d. Publications & Extra Pages: No extra pages will be allowed unless otherwise stated. No appended publications are acceptable.
- e. CCV: Applicants (principal investigators) are expected to submit a Canadian Institutes of Health Research (CIHR) Common CV by the application deadline. No other format will be accepted. The same type of CV is required for supervisors of residents applying for the Residents' Research Grant.
- i. Append one 5-year CCV only to the application.
  - ii. Use the draft version of the CIHR CCV as the CV. Please review the CAS CCV document that is provided for full details. For more information on the Common CV, please refer to the <https://ccv-cvc.ca/> website.

For all other team members, the applicant is required to submit a description of their skills and role in the project using the provided template.

f. Required Documents:

- i. Please review the appendix of required documents.

**Applications that fail to fulfill the above requirements will not be considered.**

In the event that there is a discrepancy between this document and the Guidelines and Conditions for another CAS Research Grant/Award, this document will apply.

---

## Research Program

### Canadian Anesthesiologists' Society

1 Eglinton Avenue East, Suite 208

Toronto, ON M4P 3A1
